(Recognized by NCTE, Permanently affiliated to University of Mysore)

Survey No.1, Ward No.58, Adichunchanagiri Road, Kuvempunagar, Mysuru-570023

## **ENERGY POLICY DOCUMENT OF THE INSTITUTION**

The energy policy of the institution is well planned and integrated in the institutional campus at all levels in monitoring, controlling and optimizing the institutional energy policy to conserve the use and decrease the energy cost.

To ensure this the institution has adopted various means,

1. To minimize the electric current usage, solar lamps have been installed in the institution campus, which are provided with automatic switch on and off facilities during the day and night.
2. A close watch is kept on all the bulbs and electrical appliances, where consumption of electricity can be monitored such as in classrooms lights, electrical fans, Computers etc.

These are monitored in two ways:

- i. By minimizing the usage and thereby decreasing the monthly expenditure that is spent on bills supplied by CESCO.
  - ii. By adopting low consuming electricity LED bulbs are fitted in the campus, Students are thoroughly instructed to switch off and switch on the energy consuming appliances and circuits only when they're in need.
3. To avoid unnecessary electric usage, batteries are used for speakers and amplifiers during the functions.
