WASTE MANAGEMENT POLICY

The institution has an effective waste disposal management system to manage and dispose of wastes that are created in the institution's campus. The institution consciously monitors on day today basis in various means in process in effective way of minimizing, segregating and disposing of the waste. Thus creating a sustainable environment within the campus and which leads to a progressive and safe environment for the future generation.

Institution's wastes are categorized into different kinds:

1. To ensure the **solid waste management** from the institutional campus, the students and staff are well informed not to create any waste unnecessarily. Those waste which are generated in lunch hours are instructed to the students to segregate solid and liquid waste separately and dispose them off in separate containers that are placed in the corner of the building. Which are clearly marked as solid and liquid waste
2. **Liquid waste** generated from the toilets of both boys and girls and staff members are closely monitored to see there is no seepage in the pipes. To ensure good sanitation in the campus, the institution scavenger is given awareness about cleaning and disposing of any waste that are generated in the toilets.
3. Since the institution has well maintained green campus, there is also production of enormous dry leaves, especially in the autumn season they are collected separately in a pet called biodegradation pet.
4. **E-waste:** Since the college has adopted with paperless e-waste management system, reduce of usage of paper however considerable amount of e-waste are created such as old and worn-out electronic devices, DVDs, Audio tapes,
